(54) CONDENSATE DEMINERALIZING APPARATUS

(57)Abstract:

PURPOSE: To provide a condensate demineralizing apparatus which has an excellent clad removing function and in which elution amounts of organic substances from a mix bed are slight.

CONSTITUTION: A mix bed of either a gel-type cation-exchange resin with 2.5-10% cross-linking degree or a gel-type cation-exchange resin with 44-73% water retaining function with a macroporous-type anion exchange resin is employed for a condensate demineralizing apparatus.

LEGAL STATUS

[Date of request for examination]

13.09.1999

[Date of sending the examiner's decision of
rejection]

[Kind of final disposal of application other than
the examiner's decision of rejection or
application converted registration]

[Date of final disposal for application]

[Patent number] 3330483

[Date of registration] 19.07.2002

[Number of appeal against examiner's decision of
rejection]

[Date of requesting appeal against examiner's
